AKANSHYA DASH

Atlanta, GA | (470) 830-3252 | akanshya.dash@emory.edu or akanshyadash@gmail.com | www.linkedin.com/in/akanshyadash

PROFESSIONAL SUMMARY

MPH candidate in Epidemiology at Emory University with a Certificate in Data Science and a dual background in pharmacy and pharmaceutical strategy. Experienced in epidemiologic analysis, statistical programming, and reproducible research workflows using R, Python, and SAS. Graduate Research Assistant supporting HRSA-funded HIV prevention initiatives, including the U.S. PrEP Locator, a national provider-access directory. Applied research experience includes psychometric validation of HIV stigma measurement tools through the CHIMES collaboration with Johns Hopkins Bloomberg School of Public Health. Prior industry experience at Zydus Lifesciences focused on epidemiologic profiling, competitive intelligence, and pharmaceutical portfolio strategy for the U.S. market.

EDUCATION

ROLLINS SCHOOL OF PUBLIC HEALTH, EMORY UNIVERSITY Atlanta, USA

Master of Public Health, Epidemiology May 2026

- Coursework: Statistical Programming SAS & R, Epidemiology, Data visualization, Descriptive statistics

Certificate in Data Science

- Coursework: Machine Learning, R Programming, Data Science Toolkit, Python Programming, Data Visualization in public health, SQL, GIS (Geographic Information Systems)

SVKM NMIMS SPTM UNIVERSITY Mumbai, IN

Master of Business Administration, Pharmaceutical Technology June 2022

- Coursework: Business Analytics, Project Management, Supply Chain, Mergers and Acquisition, Sales &Marketing

SVKM NMIMS SPTM UNIVERSITY Mumbai, IN

Bachelor of Pharmacy June 2022

- Coursework: Pharmacokinetics, Pharmacovigilance, Pharmacology, Molecule Designing, Regulatory Affairs

SKILLS

Statistical Methods: Regression modeling, survival analysis, hypothesis testing
Programming & Data Analysis: Python, R, SAS
Data Science & Reproducibility: Git, GitHub, Docker, Makefile, renv, R Markdown
Spatial & Public Health Analytics: GIS (ArcGIS Pro, R-based spatial analysis), spatial statistics, geospatial visualization
Data Sources & Research Tools: PubMed, Embase, CINAHL, PsycINFO, REDCap, Covidence, Elicit

PROFESSIONAL EXPERIENCE

ROLLINS SCHOOL OF PUBLIC HEALTH, EMORY UNIVERSITY Atlanta, GA

Graduate Research Assistant, HRSA-Funded HIV Stigma Reduction Initiative January 2026 - Present

- Support a multi-year HRSA-funded research initiative addressing HIV stigma in healthcare settings
- Conducted systematic review screening and structured data extraction using Covidence
- Evaluated evidence on interventions designed to reduce HIV stigma among healthcare providers
- Align evidence synthesis and documentation with HRSA federal workplan and reporting requirements

JOHNS HOPKINS BLOOMBERG SCHOOL OF PUBLIC HEALTH Remote, USA

Center for HIV and Mental Health Stigma Elimination Strategies (CHIMES) June 2025 – September 2025

- Selected for a prestigious Applied Practice Experience (APE) at the world's #1-ranked public health school (USA & globally)
- Lead project titled *"Innovative development of an expanded, robust repository of attribute-specific and intersectional stigma metrics"*
- Designed and implemented reproducible R pipelines for psychometric validation of HIV-related stigma scales across multiple populations
- Computed descriptive statistics, item distributions, and Cronbach's alpha for large survey datasets
- Developed modular, reusable scripts to support scalable analysis of multiple stigma instruments
- Executed systematic literature searches in PubMed, Embase, CINAHL, and PsycINFO using MeSH/Emtree terms

ROLLINS SCHOOL OF PUBLIC HEALTH, EMORY UNIVERSITY Atlanta, GA

Graduate Research Assistant, Department of Epidemiology (PRISM HIV Prevention Team) April 2025 - Present

- Secured a competitive GRA position supporting the PRISM team on HIV prevention research within the Epidemiology Department
- Maintain and update the U.S. PrEP Locator database covering 3000+ providers nationwide, ensuring data accuracy and improved accessibility of HIV prevention services

ZYDUS LIFESCIENCES Gujarat, IN

Senior Executive (Portfolio Management & BD; US Market) October 2022 - July 2024

- Identified and profiled over 25+ therapeutic indications in the U.S. market, providing an overview of disease, epidemiology, treatment algorithms, pipelines, competitive intelligence, unmet needs, and current treatments
- Evaluated quarterly pipelines of ~45 branded companies to identify early-stage products for development, label expansion, and new formulations, supporting strategic growth in product and market initiatives
- Facilitated portfolio analysis, product nominations, and oversaw completion of PIFs for topical, oral liquid, nasal, and injectable products, optimizing strategic product management and development processes
- Monitored ANDA and NDA approvals monthly, evaluating product competition and new nominations using IMS database
- Mapped competitive landscape for products under development and evaluation, assisting team in auditing and preparing reports for annual R&D meetings, R&D budget planning, and quarterly meetings
- Consistently monitored new developments in product data from various sources (FDA releases, clinical trial data, company press releases) to enhance competitive intelligence and inform generic portfolio strategy in the U.S. market

RESEARCH & DATA SCIENCE PROJECTS

Reproducible Data Science Pipeline for HIV Epidemiology – Children & Adolescents
R, Docker, GitHub, Makefile, renv | Emory University, RSPH August 2025 - December 2025

- Built an end-to-end reproducible data analysis pipeline using UNAIDS HIV epidemiology data for children and adolescents (ages 0–19)
- Conducted descriptive epidemiologic analysis and time-trend visualization of HIV incidence (2000–2020)
- Automated report generation using Makefile-driven workflows, producing tables, figures, and a publication-ready HTML report
- Containerized the analytical environment using Docker to ensure cross-platform reproducibility
- Implemented dependency management with renv to lock R package versions and guarantee consistent execution
- Published and validated a public Docker Hub image, enabling full reproduction of results with a single command

Capstone Research: Routine Immunization Disruptions and Vaccine-Preventable Disease Trends (CARE-Supported Districts, 2024–2025)
Epidemiologic Analysis | Emory University, RSPH January 2026 – May 2026

- Analyzed surveillance and immunization datasets across CARE-supported governorates to evaluate changes in vaccine-preventable disease incidence (2024–2025)
- Assessed ecological associations between measles incidence and measles-rubella vaccination delivery using facility-level data
- Examined trends across 399 VPD cases (measles, mumps, pertussis, hepatitis A/B, chickenpox) to identify shifts in disease patterns
- Produced epidemiologic report and poster presentation summarizing findings for academic review

OTHER

- Certified in Human Subjects Protection (CITI Program)
- Experienced in FDA regulatory submissions, clinical trial data analysis, and healthcare business intelligence tool
